# ILUMINACIÓN ARQUITECTÓNICA

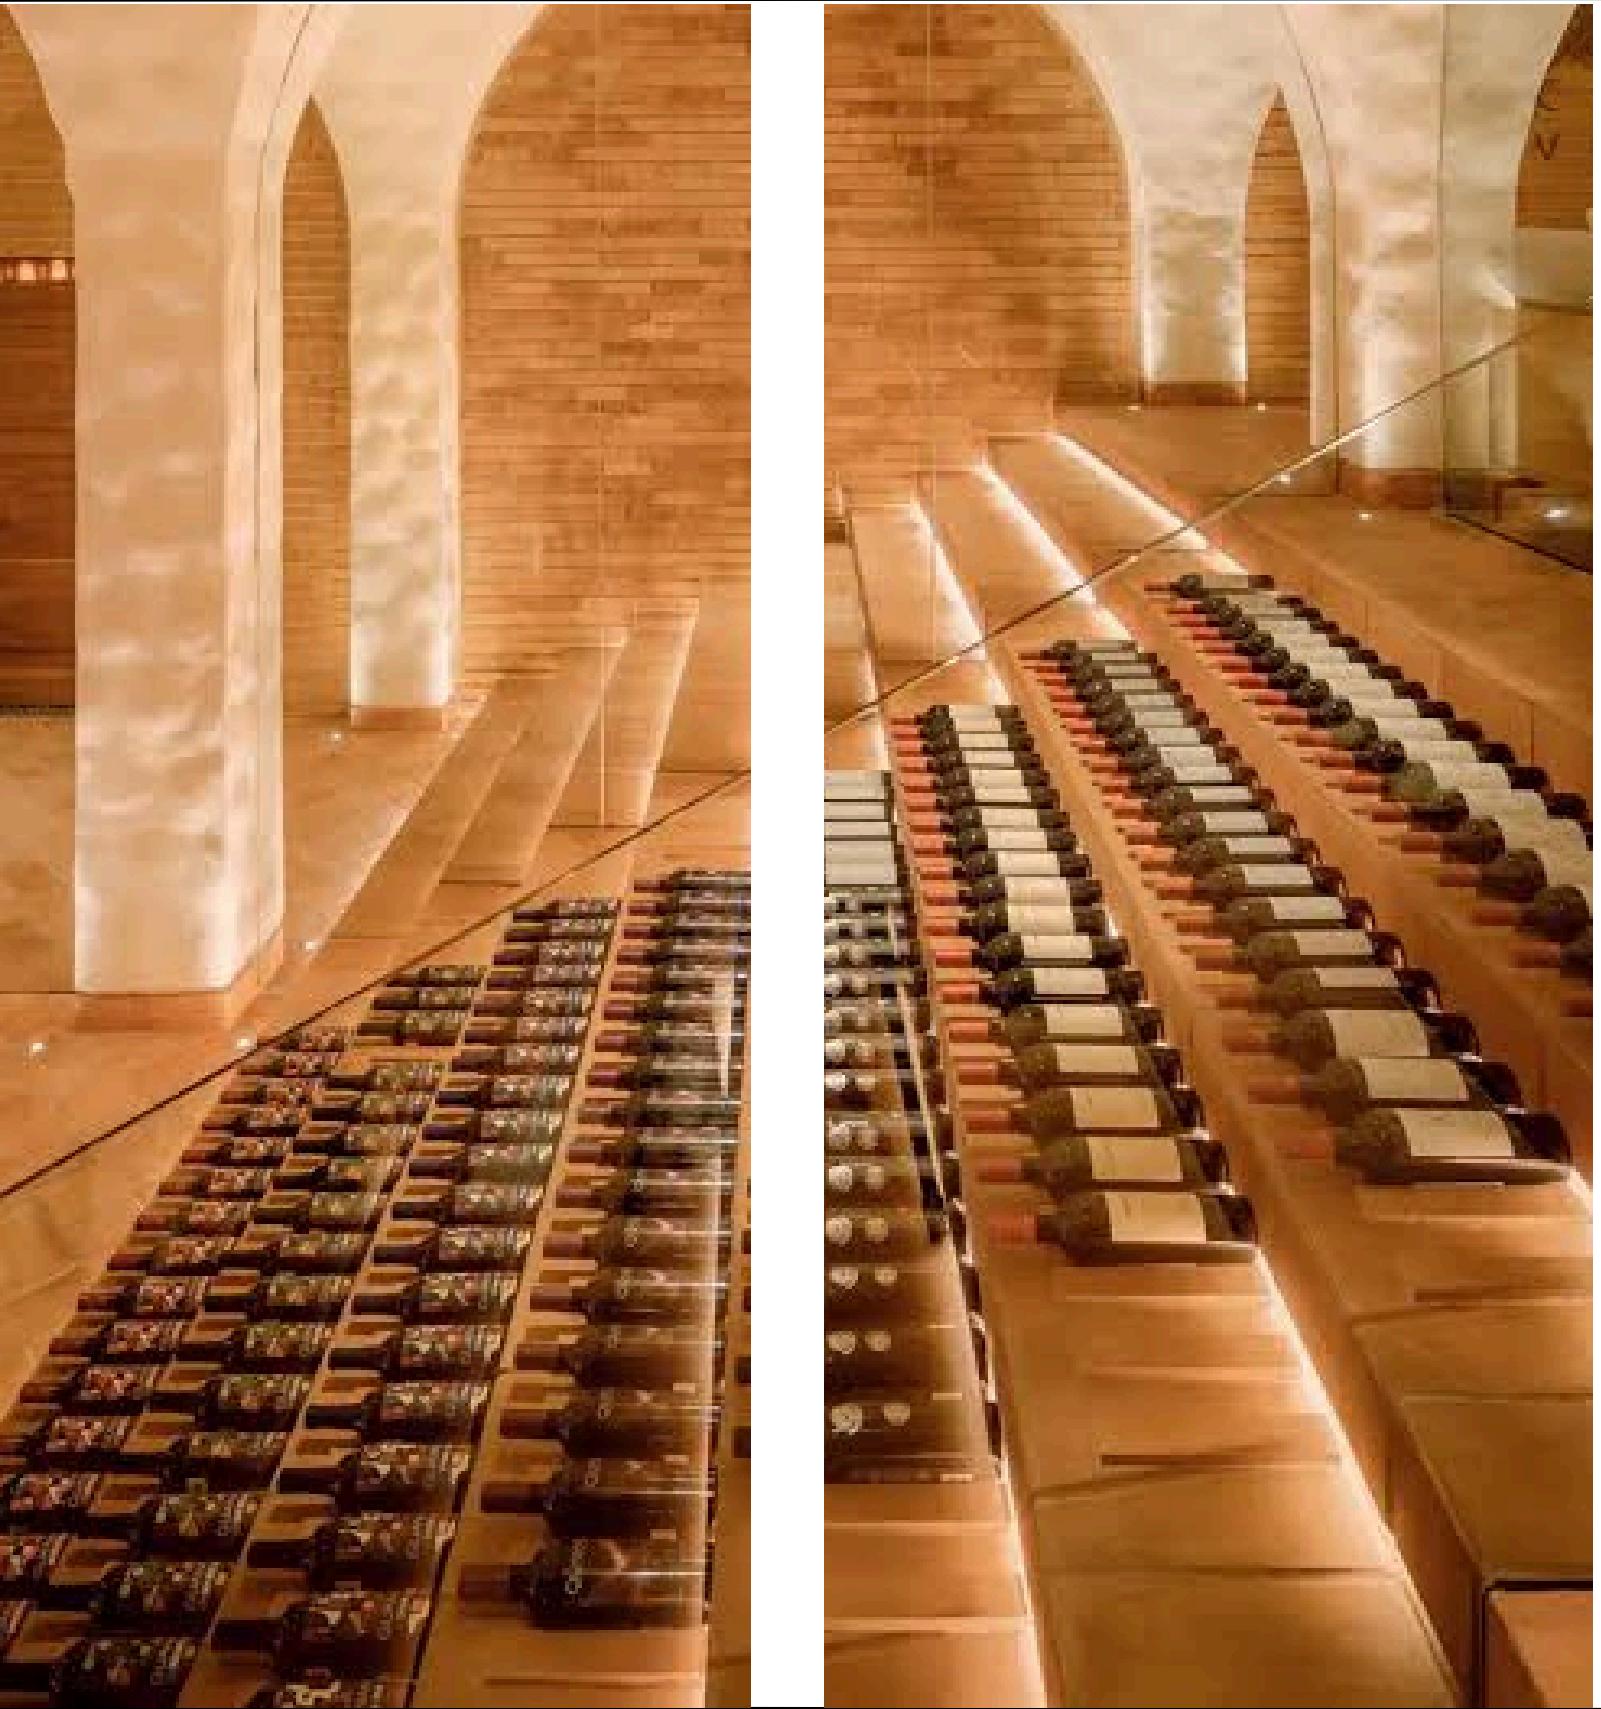

**La iluminación en Arquitectura** es el uso estratégico de la luz para realizar el diseño de un espacio. Sirve para mejorar la *funcionalidad*, destacar características arquitectónicas, crear ambientes específicos e influir en la percepción del espacio.

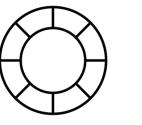

**El diseño de la luz** en proyectos arquitectónicos es crucial para lograr una *armonía visual*, maximizar la *eficiencia energética* y aportar *valor estético y emocional* a las obras.
